ANCIENT "PIPESTONE," AND ITS
LOST ARTS AND SCIENCES:

Indian Reservation same as Apparition and Resurrection.

The Pipestone Scriptures and the Pipestone Alphabet.

The Emblem of the Learning obtained from Ancient Pipestone was

Vi-Vi, Pi-Pi, Ki-Ki.
(Life) (Light) (Glory)

all ages speak her story
all thought records her glory:
Revive her Science story
Renew her wondrous glory.

This, Emblem in its travels around the World got converted into: "Veni, Vidi, Vici."

When the Key to this Literature was Lost, the Subject of the Learning became Lost.

The Ancient Pipestone Alphabet, that interprets the Ancient "Arts and Sciences" Literature:

The
Vowels

Creation, A, expresses creating.
" E, expresses ceasing to create:
Invention, I, expresses collect..
" O, expresses combine.
" U, expresses animate.

The Consonants

SHOWING HOW THEY ASSIST THE VOWELS

"I.—COLLECTS."

B,—expresses perception.
S,—expresses distinguishing.
N,—expresses discriminating.
G,—expresses attaching.

Points out the process of each letter to indicate how to collect in invention.

"O. COMBINES"

C,—expresses holding.
T,—expresses confining.
L,—expresses gliding.
M,—expresses embracing.

Points out the process of each letter, to indicate how to combine in invention.

"U.—ANIMATES"

D,—expresses unfolding.
P,—expresses pushing.
R,—expresses acting

Points out how to animate, or put into use in invention.

H.—is an aspirate and marks the place of emphasis.

An Analogy in the Mechanic Arts, to the Laws of Nature Operating the Universe.

"Julius Caesar" — an Electric-storage-battery-Engine, that ran Ten Miles a minute, on a One-rail-railway, from Crayford in Kent, England, to Chester in Wales: much of the grading of this "Wales" is still visible!

This "Victory" was thus reported by "Wireless" to Rome, "Veni, Vidi, Vici." "Julius Caesar" is thus represented as conquering England: "Julius Caesar":

an alphabet } "Julius," (joni,) called in Invention; (ju) animate in Invention; (it seems it should be) (color, celtic for, the; (sls.) Color System and Zodiac,

"Cable," (c-k-e) the Alternating Current, or Cable, (sa,) abbreviation for Electricity, (t,) acting in Animating.

"Julius Caesar" was an aggregate, or, combination of the Hundred Electric Kings of England, from 1910 B.C. to 45 B.C. (our Locomotive, today, has 150 inventions), at the latter date, this great event was: "Julius Caesar" thus got his great fame from being a copyist of "Pipestones" famous motto:

Vi-Vi, (Life;) Pi-Pi, (Light;) Ki-Ki, (Glory.)

Taken by Battin in 1837. I have compared: The Bible, Shakespeare's Merchant of Venice, and the Sioux Indian Legends, they agree scientifically. I read your article, March 31, 1912 issue. This Learning, seems to be an Heirloom from the greater age of greater ancient America! and that age said there's "Nothing new under the Sun. My opinion is, this ancient learning, was written in our frame and engraved on our brain, and all of Education is to revive what is latent in us. Would you like to hear about this ancient American Shakespeare? If so let me know." Yours truly, Gen. W. Bettesworth.

Dear Sir: I have met a great discovery. In my effort to restore the lost Arts Learning, I traced the origin of our most ancient learning to Pipestone, so I came here. I found a brief of that learning in the Indian Legends, relating to Pipestone Memorials, preserved by Sioux Indians.

The Indian Reservation, in its Abortion and Resurrection.

The Abortion, is the birth of the Electric Light. The light which COMES, and has no power to sustain itself in Heaven - or the world, is an Electric Current, which is continuous, perpetual, from everlasting to everlasting.

In Resurrection, is the Origin of the Sun; these two lights are called the two Covenants.

We have Two Laws — Lo Livis de los Divitios — Wright was the Bible in descriptions of the Indian Reservation, in Great work whereto I have a copy.

A. S. Johnson holding at the age the Merchant of Service, was written and also contained in his "Records and Ceremonies" descriptions of the World and Sciences, of its Arts, Sciences and Industries.

The assigned characters of the World and Industries which describe themselves — these are the Arts and Industries that operate the Universe, in contrast, called — we in ourselves, for we are certain before we can conceive — we live in action, thought, they do nothing. The Merchant of Service's description, or Sibboleth, is an account of the Natural Wonders of the Indian Reservation.

The Meaning of our Characters is written in our own and common, our brains, etc. of our common language, these are now known as the characters of the human species described, described by S. Johnson in; all of Civilization who receive what is taught in us.

In World Industries — 3 Laws by which man is educated — in progression, invention, and progressive evolution, are the 3 laws of the 3 letters into an Alphabet: consisting of Letters which are Inventive characters: Words are composed of these inventive characters: Therefore each word is a new Invention: composed of many inventions, or aids to Invention in 3 letters it contains: the Standard of the inventive letters in one word would be minuscule, or lower case, or upper case, or letters or symbols.

The inventive words composing this Alphabet are represented by its Vowels. A, E, I, O, U.
A. is the vowel; Second, O comes, Merchant; third, E and U to this, what has been created. Every invention must pass through in this manner the mind of the Inventor.

It must be admitted there is a circulation of life, and in the Universe: the word Universe is an abstract idea — and this circulation is instantaneous: for it is said it takes 400,000,000,000. four hundred billion vibrations per second, to produce to us visible light; this Motion, is called the Alternating Current, the to and fro motion, and this makes the Universe a Unit.

Between the Earth and Heavens, there is an effect when an Electric Current from the Earth passes through the Light, and the Light, there is informed, or proceeds.

An Alternating Current, is a current, in the heart of the entire Universe and returning, and such is the cycle of the entire system, and of man's Arts and Ceremonies, who is seen. The Science, Ceremonies and Ceremonies, are initiated in the religious worship: Great Electric Arc Light Lamp, which is a continual festal of the entire universe, throughout the entire system, upon the earth, and throughout the entire system, the figures are in every day.

Electric Arc Light. The light which COMES, and has no power to sustain itself in Heaven — or the world, is an Electric Current, which is continuous, perpetual, from everlasting to everlasting.

In Resurrection, is the Origin of the Sun; these two lights are called the two Covenants.

The Indian Reservation in Abortion and its Resurrection, for the former contains the latter, and the latter explains the former, where expressed Abortion, and Resurrection are placed in Resurrection. These two have to have met with definition, at the thought, of other lands, where emigrants had taken up.

Notice of the original nation still remains to Resurrection here:

Resurrection, or again, and also, death, Resurrection, rising, coming from life of death. It is a euphony letter, and Q a euphony letter, that there is only, a, in one and e, in the other, and celtic, e, is the same as English a: again if R, is an eroso fort, the i is a, or in, and in the other, then e is a diphthong between a, and rae: it expresses Create, and ac, is, in Latin, the first, and here, or show what is done, in death, how it is done.

The Greeks received the Alphabet of Hebrew, from the Persians, as Judah, — and Moses and his learning also, and we now have the Alphabet of Hebrew explained by learning, without the learned.

Now, it is an open question with the learned, if in a combination of the letters, like God, Life, is in Resurrection & the Merchant of Service?

The Merchant of Service, in 2010 he says, I, Chap. 1, p. 11, No. 4, at home in Boston, Mass., 11, 10, 11, 4004, 100, 4005, 1006, 1007, 1008, 1009, 10010, 10011, 10012, 10013, 10014, 10015, 10016, This is the "Stone" which was set at night by our builders. Acts IV. 11.

The Indian Reservation same as Apparition and Resurrection.

"Pipestone" was:—
classic for its Learning,
and Holy for its Science.

Pipestone, the Birth-place of Christianity.

An Alphabetic Analysis of Scientific Words appertaining to "Pipestone Minn. U.S.

These Arts and Sciences, are written in our Frame and engraven on our Brain.

Indian:

(a) an abbreviation for arc-space same as gen I. vi, expresses the arc-space between the Solar System and the Zodiac—Heaven and earth. When an electric current passes an arc-space Light comes, the Origin of light. An electric current passes this arc-space continuously all over. (c) means two; again, (d) unfolding in animating the electric current at an arc-space. (e) collect in invention, the electric current at the arc-space; i.e., is, also, an abbreviation for the Solar System—Island. (an) expresses the arc-space in the Sun. Notice that in is an abbreviation for the arc-space between the Solar System and the Zodiac, and an, the arc-space in the Sun—these are the Two Covenants.

Reservation:

(Res), re, expresses repeat and s, for plural, repeat continually; (es, or us) the electric fire, or the flame at an arc-space, on the passage of an electric current, (e) expresses voice, the voice of the electric arc-light.

(at, or ath) an abbreviation for the Solar System, where the reservation takes place;

(ion, or ion) an abbreviation for the electrolytic action that takes place at the arc-spaces in the Sun causing the flame of the Sun.

Notice: The Learning of "Pipestone" wholly appertains to. How the Sun is formed; the learning prior thereto, seems to have been called Paganism, and those people still bear such a designation.

Apparition:

(app). this means, the creation or. Sun. ap is a Welsh, Briton, or Breton word, they were the ancient people of America; (a), create in invention; (s.) acting in animating; iti, words that can be read both ways, express a "to and fro" action—a Negative and Positive action, at the arc-space, on the passage of an electric current—here at the arc-space in the Sun, (cc, or ac) ac. an abbreviation for the Alternating Current.

(on, or an) an abbreviation for the arc-space in the Sun.

Note. Christianity is founded on the resurrection of the Alternating Current—same as Jesus Christ and is the doctrine of "Pipestone", which the "Redmen" carried all over the world, ages and ages ago.

Resurrection:

(Res) expresses repeating continually; (uss) expresses the great electric fire at the arc-space in the Sun (cc or ac), an abbreviation for the Alternating current; (t,) confining in combinings; (ion, or, ion) expresses the electrolytic action, caused by the "to and fro" electric current action at the arc-space in the Sun, whence, arises an Alternating current—called the resurrection.

"Indian", "Reservation", "Apparition", "Resurrection", are the words that preserved the Ancient Learning of the Science of the Universe.

These Electric Science abbreviations found in the formation of words appertaining to the resurrection, is the best evidence of their source, is the "Pipestone learning".

On what these Actions are founded.

These actions are founded on the superior motion of the Solar System, which creates an electric current, which passing the arc-space, between the Solar System and the Zodiac—Earth and Heaven.—Light Comes, from which arises, or proceeds, an Alternating Current, which proceeds in darkness, and passes throughout the Universe, instantly, and returns to the centre of the Solar System, from all round about, and forms an arc-space. The Alternating Current is carried by Atoms (children of Israel); it ceases at the 'threshold' of this arc-space, into which its electric force and atoms enter, and organizes, therein, a "to and fro", a Negative and Positive action, causing an electrolytic action, producing the Flames of the Sun, whence, arises the Alternating Current, or, an Alternating Current: When an Electric Current passes an arc-space an alternating current proceeds.

This is a brief view of the Perpetual Action, that is the Fabrication of the Universe and is the wonderful Learning of previous untold ages, preserved by "Pipestone", Legends orally preserved for untold ages.

Applying this Alphabetic Analysis, of the Pipestone Alphabet, to other words where the Redmen settled we see the same result—all bear testimony to "Pipestone": take the words Testament, Jerusalem and Adonizedek, well known Bible words:

Testament: (explains its meaning)

(te) confining in combinings; (t.) the electrolytic action at the arc-space in the Sun; (an) H. Alternating Current which proceeds from electrolytic action; (ent) abbreviation for cont. (100), the whole order of the Universe.

Jerusalem: Mr. Sayee, writes it,

(us) the Electric Arc Light fire; (us) Solar System and the Zodiac; (el) the Electric Arc-Light; (an) the Alternating current. Jerusalem the City of Peace.

Adonizedek (King of Jerusalem)

(adon), ad, great, on, or, an the arc-space in the Sun; (iz) same as iss, or as, the great electric current; (ede) the "to and fro" and negative and positive action at the arc-space in the Sun; (K-ea) the Alternating current;

Hence, this word is made of Science abbreviations, to show how the Sun is formed.

St. Sioux Legend of Pipestone containing the Lost Arts Learning,

containing the traditional Arc-spaces of the remotest times. The Cabala is an art of eliciting mysteries from the Words and Letters of the Old Testament: - The Popular and Critical Bible Encyclopedia.

Now see how this is done from this Sioux Legend:

I have presented this Oral Legend, obtained by Cather in 1837-75 years ago, as given in North American Indians, Vol. II, p. 193; no white man, so far as I know, has ever so much as dreamed what it contained, or was about, or that it contained, the learning of the

(The "Cabala": 15. 15. 30.)

it explains the subject refers to, How the Sun is formed, or what is the Sun? and how made? 15 lines always refers to the Sun and its organization.

The Ancients taught
the Salvation of the Universe, which
the Sioux Legend explains, hence the
idea that the Scriptures teach us how
to be saved. Their motto was
Childless Salvation without Education -
a Knowledge of how the Universe is pur-
ed. This defines Christianity, the sub-
ject of this Sioux Legend.

All these things take place instant-
ly in the twinkling of an eye. We
cannot see unless there was a motion
at least (400,000,000,000) four hundred billion
times a moment.

The Legend must be learned by rote,
so that the mind can locate its descrip-
tions in their operation; just as you
learn figures and can add them
in your mind! Figures record "The
Orders Beautiful," which this Legend
describes: Learning the meaning of fig-
ures will greatly facilitate in the acquisi-
tion of the learning of this Legend.

Words are composed of letters each let-
ter is an inventive character and a
combination of these inventive charac-
ters explains the meaning of the words. We
find the Cabala which pointed out the sub-
ject and we find the arrangement of this
old Alphabet: I restored the Cabala, to the
learning, and the inventive character to the
Letters of the Alphabet and arranged them
in due order of inventive sequence.
As people in all ages had the same Lit-
erature, the same Cabala, the same Alphab-
et and the same Figures. We find the
same Old Scientific words and the same old
inventive letters, and the same old Figures
that record The orders Beautiful. I
in the present method of finding these
old Scriptures and arranging this old
alphabet their Scientific meaning is ob-
scured.

The Popular and Critical Bible Ency-
clopedia, says: "The Cabala is an art for
eliciting mysteries from the words and
letters of the Old Testament++ containing
the Traditional Learning of the

Of the remotest times."

The word "arc-space" makes it look
strange: its mysteries are the electrics
that operate the Sun-shell in the Sun;
the electrics of the Universe, a
universal Electric arc at the arc-space
in the Sun, and adding, add to the Sun, thus
again, in the arc-space where the Sun is made.

Before these wonderful facts could have been
arrived at, there must have been a great deal
of detail ascertained: what were these details?
The substances that translated the Scriptures
must have been known and their detail known. These
substances are described verbatim from Genesis Chap. 1, v. 1 to Exodus XI, v. 19: the Solar Spectrum also constitutes the
Colours in the Cloud of Scotland: so that these will all
figure in, in what places at this arc-space.
I have given their order in the "Mosaic Stone"; also I
have given the 100 electric Kings of England, France
Babylon, Egypt, etc., from 1500 B.C. These latter
describe the inventions on the

Electric Storage Battery Gyroscopic Engine "fables"
Cayzer, which runs from Oldford in York, England to
Chester in Wales at the rate of 10 miles an hour;
our locomotive has 150 inventions. As these
discoveries were applied to work out the ori-
gin of the Sun, that 3 Arts and Lights the Univer-
sity of the Sun, that 3 Arts and Lights the Univer-
sity and gives us life and health and all
things.

Lost Arts.**The Atomicity**

of Matter set forth in this Pipe-
stone Sioux Legend.

**The Sioux Indians were the Temp-
ple Keepers of the Learning of the Sun-**

when all the Tribes were at war. That is, be-
fore the discovery of the Alternating Current which
brought peace to all the Systems of the Universe.
The Great Spirit sent messengers and called them
all together at the Red Pipe - the arc-space in the Sun.
This Current is the Alternating Current. The Alternating
Current is born of the Electric Air Light. When an Electric Cur-
rent passes an arc-space, Light comes, and an Alternating cur-
rent proceeds therefrom.

The Alternating current is carried by atoms: These atoms
are the lightness. When the Alternating Current has passed
throughout the Universe and returns to the centre of the Sol-
ar System, it meets from all round about and forms an arc-
space across the centre of which the electric Currents proceed
to pass "to and fro", creating an intense heat so that the atoms
vibrates with a million millions all round about. When the
atoms cross this arc-space which have carried the Alternating
current, they leave the Alternating Current on the edges of the
arc-space.

And he stood on the top of the rocks,
because there were no atoms to carry it further.
and the red people were assembled in infinite
numbers on the Plains below.

that is, the atoms are assembled in the arc-space below.
Here is an explanation how this arc-space is formed:
He took out of the rock a piece of red stone and mades

Large Pipe:

Here the Large Pipe is the arc-space where the atoms
pass "to and fro", and create the smoke of the Sun.
Told them it was part of their flesh,

flesh is electricity which has been derived from the late
Alternating Current force and its atoms, hence it is part
of their flesh.
That although they were at war they must meet at this
place as friends that it belonged to them all.

The atoms are not destroyed, their sins and iniquities
by taking away, hence, they must meet at this place as
friends.

what becomes of the Electricity set free by the heat of his arc-
space?

That they must smoke their Calumets (sic) pipe from it
and smoke them to him whenever they wished to appear
him or get his good will.

That this smoke, his Electricity, in its flame organizes

the Alternating Current, which goes again: this located

appeal him! At the return of, or the Alternating Currents

because when an electric current passes in arc-space an

alternating current proceeds therefrom.

The smoke from his big pipe rolled over them all.

and he disappeared in its cloud.

The flames of the Sun from this arc-space rolled over them

all and he disappeared in its cloud: the Alternating cur-

rent proceeds, invisibly, in darkness.

At the last, whiff of his pipe a blaze of fire rolled

over the rocks and melted his pipe,

The piles of his arc-space are the rocks, and melted the surface

of the stones. The last whiff he only gave one whiff so it

was the first, as well as the last, at

that moment two squares went in a blaze of fire

under the two Medicine rocks.

The two squares should be square, so it can be read

forward and back to indicate it expresses the "to and fro",

expressing the great animation which is implied there.

as the movement of the Alternating Current is instantaneous, so we must con-

sider these actions at this arc-space are instantaneous, the order of their present

action in this Legend being the supposed order of their action, or taking place.

The Medicine Rocks are the sides of the arc-space, hence Medicine is the

equivalent of electricity. A Medicine Man, was the electrician of the tribe.

Where they remain, this implies they are perpetual.

Why was PipeStone selected as the Scene of this

Wonderful comparison? Proceed to investigate.

An Alphabetic Analysis of the meaning of words.

God, (a) attaching in collecting; (b) combining in Invention; (c) unfolding in Animating. The Electric Arc-light, that comes out of the passage of an Electric Current of the arc-space between the Solar System and the Zodiac—Earth and Heaven—God is Light.

We, is an abbreviation for the Solar System and the Zodiac. Man, is the Alternating Current; when an Electric current passes the arc-space between the Solar System and the Zodiac, light comes, and there proceeds an Alternating Current—the only begotten Son of God—same as Jesus Christ—man, is also as follows:

(m), embracing in combining; (an) an abbreviation for an arc-space where light on the passage of an electric current comes;

Formed, (f) voice, the electric arc-light; (or) an abbreviation for the electric flame; (m), embracing in combining; (c), ceasing to create; (d) unfolding in Animating.

Breasted, (g) attaching in collecting; (r), or (or) electric flame at the arc-space; (u) animate in Invention; (n) discriminating in collecting; (d) unfolding in Animating.

Blew, (b), perception in collecting, atoms, or, electricity; (l), gliding in combining; (c), or, combines in Invention; (w), great animation, of the electric flame.

Nostrils, (n), discriminating in collecting; (t), combining in Invention; (st) abbreviation for the electrolytic action at an arc-space when an electric passes; (r), acting in animating; collecting and giving it a gliding motion—imperceptible motion, that is, an invisible motion; (s), poural, expressing continuous action.

Breath, (b), perception in collecting, electricity; (r), acting in animating; (ca) abbreviation for the Alternating current; (t), confining in combining.

Living, (b), gliding in combining; (int) abbreviation for the "to and fro" electrolytic action, that produces life like we fearfully and wonderfully made"; (n), discriminating in collecting, the refined electrolytic current; (g), acting in collecting, same, Words that can be read both ways as int, refer to electrolytic action, the negative and positive, or, and so electric motion at an arc-space on the passage of an Electric current.

Lord, (b), gliding in combining electric motion; (ca) the electric flame at an arc-space, on the passage of an electric current; (d), unfolding in Animating.

Stone, (a) creating an electric flame at the arc-space on the passage of an electric current; (b), gliding in combining the electric actions; (on, t, m), the arc-space, where the electrolytic action takes place.

Likeness, (b), gliding in combining; (int) collecting in Invention; (Kosca) an abbreviation for the Alternating current; (cu, ro, in), an arc-space, between the Solar System and the Zodiac—Earth and Heaven.

Ours, (c) combine in Invention; (u) animate in Invention; (b) acting in Invenating.

A Preliminary Description.

"Let there be Light and there was Light." Who did Light come? God, the electric arc-light is here we speak, and the speaker describes itself, but seeming before he speaks as had said: "Let us make man in our own Image?"

"Let us make man in our own Image?"

Us, is the Solar System and the Zodiac—Earth and Heaven. We only consider Earth and Heaven as Carbon joints, and where and when an electric current passes on to the other, light comes; we have isolated Earth and Heaven in these "Carbon points".

When an Electric Current passes an arc-space, and then light comes, which from the light, at its heat, produces an alternating current, called man and God created man in his own image.

An Atom is ground. And God formed man from the ground; "And he blew into his nostrils the breath of life"; therefore, the alternating current is formed from atoms; and the electrolytic action, later, glad, where man, the alternating current is formed, gives the alternating current its force, and motion, and thereby it becomes a living soul, endowed with speech: the power to create light and

I can state here that it

God is the Electric Arc Light;

Lord God the Alternating Current;

Lost is the Sun the source of heat and light life;

they are called the Trinity—the three in one.

When the Alternating Current is formed, it proceeds in darkness, throughout the Universe, and then returns to the centre of the Solar System from all round about, and forms there an arc-space, when it proceeds to pass and repass. The alternating current does not go into the arc-space, but ceases, in a deep sleep, at the edge of the arc-space, and he slept and he took away the of his ribs, that is, the electric force and atoms, do enter an operate-pass and repass, and from this arc-space, these operations, creating light, heat and flame, and this is the meaning of

"and he took away one of his ribs and built flesh upon it and joined it and brought it to Adam and Adam awoke from his sleep and behold a woman was standing before him."

A rib is a bone, one of Adams bones, one of the atoms of the late Alternating Current, and built electricity through the Negative and Positive, plus the action—Electrolytic action—upon it. When an electric current passes an arc-space light comes, and then proceeds an alternating current—and Adam the Alternating current awoke, as a woman; we, and man, man is the Alternating Current, and we; (w) great animation at the arc-space on the passage of an electric current, (g) combining in Invention; so that woman expresses the great electric flame at the arc-space on the passage of an electric current out of which the alternating current is born.

And he said this is a bone of my bone, and shall be called woman for this was taken from me, and Adam called her name Eve for she was the mother of all living.

The electric flame, of which Eve is the voice, is the mother of all living, I create the voice of the Eve seems to express, I create the voice of the Adam the Alternating current, and Eve the voice of the Creator.

And Adam called her name Eve for she was the voice of the woman is the voice divine.

At what time these Electric Science terms, and women, were taken over, and applied to Human Beings, I have not found, it seems natural to have done so.

(cont'd)

Mr. —One is astonished at the simplicity of this description: They seem to have been fully conversant with the organization and operation of the Human System, and to have couched their language in a two-fold sense: What describes the organization and operation of the Universe, describes the organization and operation of the Human Being, we derive the idea that "All men are created equal."

An Art Formula:

The Scripture Learning - "The Bible" is condensed into an Art Formula. Figures - numerals - are separately and collectively an Art Formula. The Scriptures describe "The Electric Origin and the Electric Operation of the Universe;" figures contain records of the Laws and their order and action.

1. Expresses motion - gravitation - original motion.

2. Expresses the Heavens and the Earth, the Zodiac (Zod.) and the Solar system (S. S.).

3. Expresses the S. S., Zod., and the Electric Arc Light (E. A. L.), the latter coming when an electric current passes in the space (electric arc) between the S. S. and Zodice.

4. Expresses the S. S., Zod., E. A. L., and the Alternating Current, the latter originating at the Arc between the S. S. and Zod. from the effects of the positive and negative electric action thereof.

5. Expresses the S. S., Zod., E. A. L., A.C., and the Sun, the Day Electric Arc created in the centre of the S. S. by the A.C. whose intense action gives Light and Heat.

6. Expresses the S. S., Zod., E. A. L., A.C., S. and the Difference of the Electricity from the Electric arc in the S. S. to the S. S. and its bodies.

7. Expresses the Seven Planets of the S. S., Mars, Venus, Mercury, Jupiter, Saturn, Uranus, Neptune?

8. Expresses the Planets and the E. A. L. to each.

9. Expresses the Three Days, gravitation, Revolution & Electricity under judgment to each.

10. Expresses the Planets and the three intermediaries - the E. A. L. to the Sun.

(Electric Emblems.)

J, a point in some age in some land, for i;
K, hard pronunciation for C; or **Ca**, the Alternating Current.

Q, seems to be an abbreviation for **Ull**; might have been a paragraph mark - a pilule; to know how to take electricity from the Sun, seems to have been considered as essential to be known as the alphabet which organized the literature to develop how the same could be done; it was the object of the literature to prove this to these letters which show how to take electricity from the Sun, were sent along with the Alphabet; we call them vowels for we say **U** and sometimes **U**, **U**, **U**, **U**, so we associate them with **U**.

U, animates, creates the Electric Flame and **V**, and **X**, and **Y**, and **Z** indicate how to take electricity from the Sun by means of the **Mile**, which these characters express. **Z**, is the sign of the Alternating Current the source that animates **U**.)

X, **X**, seems to have been an abbreviation for **CCS**; the **X** may have expressed the **Cross**, to the electric current at the Electric Arc in the Sun. All these differences are merely syllabic abbreviations or electric emblems, to show how to take electricity from the Sun.

A "Chronicle" Explaining the Electric Learning of the Peruvians.

The "Cabala" contains 45 lines: three times fifteen; and each fifteen consists of eight lines and seven lines; thus suggesting the comparison between the Solar System before and after the discovery of the Alternating Current.

NOTE: "Soon after," the departure of Virachoca, who came a long time after the constructions of Tiahuanaco.

The structures were made to conform to the Literature not the literature to be a description of the buildings.

The temple of (Chocha) Cacha was built to the "Apparition," who appeared to Inca Virachoca when he was among the Shepherds of Chita.

Cacha was on the northern slope of the divide, dividing the waters flowing to the North and South. Cacha on one side and Ayavire on the other—though fifteen leagues apart. Cacha was a village of the Canches, they had seven towns (Sicuani, Caha, Tinta, Checucupe, Pampa Marea, Yanacocha, Lanqui) and the Canas six towns, (Chaca, Pichigua, Yacuri, Coparague, Tungasaca, Surimani). The Canas occupied one side of the Vilcanayu ravine, and the Canches the other.

The Canas and Canches made wars upon each other, and built their villages in strong fortified portions called Pucaras. Vol. 1, p. 356.

The Canas were proud, cautious and melancholy, their clothing was usually of a sombre colour, and their music was plaintive and sad (like the Cananites). The canchas were joyous, light hearted and sociable but very poor, their clothing consisting of skins. (Vol. 1, p. 356).

The Alternating Current—the to and fro current—the ancients modeled in the Temple (an electric power house), or a store house of electricity, this electricity had been taken from the Sun, and here stored for use, at Cacha.

"Buttons" seems to be the identical word we now use to turn on the electric current,

"Touch the Button"

hence we can readily design its use when it is here stated the Vestments (electric currents) were fastened (connected up) with buttons.

32. That if he was an Apostle
33. He would work with the Power of God
34. In his preaching to these people

45. And the Glorious Cross planted in all directions.

NOTES.—(Continued.) Fastened, that is connected, the electricity connects all the signs of the Zodiac; Butt, (in buttons) means over, and ons, may mean an, that the electricity from the Zodiac passes over the arc-space—to and fro—a to and fro motion; glorious, intense glory, the intense light at the electric-arc when the electric current passed the Zodiac was lighted up; preaching, the voice of the reaching, that is, the electricity from God (from the arc-space between the S. S. and Zod.,) knows that when the electricity has passed it forms the Alternating Current; Not, means negative—the negative electricity—here, instead of "I know not," being a denial it is a positive assertion; the Power of God, the Alternating Current, which thence proceeds throughout the Universe and returns—to and fro—go and come; people, orbs of the Solar System; work with the Power of God—work with the Alternating Current, when this returns from going throughout the Universe it jumps across from the Zodiac and passes to the centre of the Solar System where it meets at its centre, and forms an arc-space and assembles "round about" this centre forming in its, to and fro, passage across this electric arc the Sun; the vestige of its visit—the Alternating Current—is here called the Devil, and its great power

is shown in the flames of the Sun, millions of miles in extent; heathen and vain sacrifices were offered up; the Alternating Current, has, to carry it, atoms, atoms are composed of electricity and carry electricity, these atoms are consumed—regenerated—and their substance is restored to its original form, electricity, at the intense action in the Sun—this melting the atoms with fervent heat and setting free their electricity is called, the electricity is called, and its flame, the Holy Ghost, these things have always been since the world began, since the Sun was formed, the alternating current is the source of the Sun; all the temples profaned, the temples here referred to are the orbs in the Solar System, temples not made with hands eternal in the heavens—the temple of the apparition. This Light, the Arc Electric Light comes when an electric current passes an arc-space, hence it is called the Apparition Light—the Light and Life of the Universe—the story of the Glorious Cross—where the sins, the atoms of the alternating current are regenerated, and their substance is purified, born again, the new birth, planted in all directions, that it proceeds therefrom in all directions throughout the Solar System, as the alternating current ceases, dies on the Cross, at the crossing.

This Cuzco temple was an Ancient Ocean-Cable-Power-House. It obtained its Electricity from the Rays of the Sun, and then, in some way, in these passages beneath ground, transformed it (by the Alternating Current systems?) into the Potentials desired for use. All our names refer to these Systems of Electrics.

It is stated in the "Chronicles of Peru," Chapter V: "Atahualpa, a prisoner, agreed with Pizarro, to give him a house of gold for his ransom," which was paid,—say sixteen million dollars. However, it is stated that at Cuzco a law was made, "that neither gold nor silver that once entered Cuzco should ever leave it again, on pain of death to be inflicted on the transgressor. Owing to this law, the quantity that entered being great, while none went out there was such store that if when the Spaniards entered they had not committed other tricks, and had not so soon executed their cruelty in putting Atahualpa to death I know not how many great ships would have been required to bring such treasure to Spain as is now lost in the bowels of the Earth, and will remain so because those who buried it are now dead."

The Peruvians lived to the letter of these "Chronicles," and they hid their gold and silver, in the passages and tunnels in the Sacsahuaman Hill, and then closed them with one of their close fitting stone doors. But now we have rediscovered how their temple was built, and its object, this literature opens up the hiding place of this famous temple. We must remember there was no commercial value for gold and silver in those days. How, or why this Ocean Cable ceased to be operated I don't know, after it ceased the Peruvians seem to have converted Power-Houses into Temples of worship, as did the Jews (Peruvians) at Jerusalem. The Electrics of that age was far in advance of Electrics now.

Specimen Chronicle and Cabala

1. Soon after they made a Temple (a)
2. In the Village of Cacha (b)
3. On the other side of the River (c)
4. Which passes near where they set up (d)
5. An Idol of Stone Very Large (e)
6. But in a somewhat narrow recess (f)
7. This recess is not so large as those in Tiahuanaco (g)
8. Erected in memory of Ticiviracocha
9. Nor dose the figure appear to have
10. The same kind of vestments (h)
11. Some gold was found in holes near it
12. When I passed through this Province
13. I went to see the Idol
14. For the Spaniards affirm
15. That it may have been some Apostle
16. I heard many declare
17. That it had Legends written on its hands.
18. But this is nonsense unless my eyes were blinded
19. For although I looked closely
20. I could not see anything of the kind
21. The hands were placed over the haunches
22. The arms twisted
23. And on the girdle were indications
24. That the vestments were fastened with buttons

We have traces of three ancient round the world Electric Cables:

1st. From Council Bluffs, via Baffins Bay, Greenland, Iceland, Europe, Asia to place of starting.

2nd. From Mexico via Yucatan, Cuba, Azores, to Spain, the "Columbus route."

3rd. From Peru via Brazil, Cape de Verde, throughout Africa down the Nile to Asia.

NOTES: (a), the Sun, (b), Solar System, (c), arc-space created by the alternating current when it meets round about the altar, (d), the zodiac, (e) the sign of the zodiac, or all of them, (f) space between the signs or the turrets on the tower, (g) the arc-space, (h) the electric arc-light that comes at the arc-space between the S. S. and the zodiac, when an electric currant passes, is larger there than the electric arc in the Sun. "Vestments," Solar Spectrum, Ticiviracocha: Arc Electric Light Wire Cable.

The vestments of the Sun, (the Solar Spectrum) produce gold. The specific gravity of gold is 19; and 19 is the "Cabala" of the Alternating Current; it seems to express the idea that gold is there formed, through their action.

NOTES: "I," (line 12) the Arc-Electric Light; province, sign of the Zodiac or S. S., Spaniards, arc, or, span, the arc-space between the S. S. and Zod.: Apostle, there were 12 Apostles, so there were 12 signs of the Zodiac, meaning, son of the Divine Light; Legend, art formulas, such as the Lord's Prayer, the Song of the Fountain, and the Rock of Ages, these were directions of the architec to the Bulder; the hands, the positive and negative electricity at the arc-space between the S. S. and Zod.; he does not deny the legends are there, merely raises the question to increase investigation, to inspection; he is talking about the positive electricity passing from the S. S. to Zodiac, which he says he can't see; the haunches, arms twisted, girdles, refer to the Zodiac; Vestments, a tunic, a close fitting dress, the electricity that fits or sits close to the body which it surrounds.

The oldest line 3 Periods, the next 2 Periods, and the last 1 Period of the Electricity of the Earth's Orbit ago; a Period is 1,655,555 years—that of the Eccentricity of the Earth's orbit.
